

Workshop Manager – MTS Group, Cumbernauld, Scotland

About the company:

For over 25 years MTS Group has been providing machinery, equipment, and vehicles to industries across the UK. Offering a varied product range for both hire and sale, allowing our customers to choose which option works best to achieve their business goals. Today our business specialises in two key brands for which we are official UK dealers, Bobcat and Club Car. We offer their market-leading products to a range of industry sectors including, utilities, Recycling, golf, construction, facilities management, local authorities, Landscaping, agriculture and events.

Job Role:

The workshop manager will report directly to the Operations Director and will be responsible for the daily control of the workshop and distribution Centre to maintain a high level of productivity, quality and "right first time" repair. The workshop manager will run an efficient operation ensuring customer satisfaction and retention through achieving maximum utilisation of workshop facilities, as well as overseeing and motivating all workshop colleagues and will actively contribute to the implementation of safe working practices and security within the department

Responsibilities to include:

- Day to Day management of the Cumbernauld workshop and distribution Centre, inclusive of staff, plant machinery and vehicle management (golf and utility vehicles) for hire related activities.
- Ordering the necessary parts and liaise with the internal MTS aftermarket team
- Manage quality and performance issues in all aspects of the workshops production – including manufacturer warranty work, loss & damages activity.
- Establish and implement effective housekeeping and workshop management including stock control
- Carry out and arrange routine inspections & required maintenance of all plant machinery, golf and utility vehicles
- Organizing (or on occasion) attending machinery breakdowns and callouts.
- Ensure all in the Workshop have adequate supervision in their assigned tasks.

Skills required:

- Extensive knowledge and experience of working with Plant Machinery & Equipment (minimum of 5 years' experience).
- Clean driving license
- Awareness of health & Safety requirements
- Good verbal communication skills.

Qualifications:

- NVQ or equivalent
- Time served engineer

Salary: DOE
